

Teachers' Christian Fellowship of NSW

presents a **FREE** webinar

Creation and Conservation

Tuesday 19th March 2024

4.30-5.30pm

Environmental concerns are no longer on the fringe of contemporary culture and politics. Our students are affected by the story told by secular culture about our planet, its origins, its purpose and its future. What does the Bible say about our relationship to the natural world and our future hope? How do Christians (and specifically Christian teachers) live out convictions regarding creation care?

Presenter: Susan Pursell, BA, Primary Dip Ed (Masters), Diploma of Bible and Missions.

Susan currently teaches casually, looks after her 3 young children and co-ordinates some of the children's ministries at her church. She is married to Sam and they have the great honour of serving at Oak Flats Anglican Church in a very special part of God's creation.

Registration is necessary to receive the link. Last day to register: 13th March 2024.
